Schneider  Write it

Every thought
is worth
writing down.

We understand the social and emotional significance of writing in your everyday life. Our writing instruments give you the opportunity to write down your ideas and messages and to transmit them – how, when and where you want to.

We believe every thought is worth writing down,

Environmental responsibility is very important to us:

Recycling of product components

Electricity is 100% from water-power/regenerative energy

No PVC/only pure materials as PP and PET

Developed and produced in Germany

Reduction of emissions and waste

Long lasting, sustainable products

EMAS

VERIFIED
ENVIRONMENTAL
MANAGEMENT
D-169-00015

Quality. Made in Germany.

Schneider is an internationally leading brand for writing instruments. All products of our complete product range are characterised by quality, writing comfort, design and suitability for everyday use.

As owner-managed family-run business with more than 70 years of experience and expertise we are aware of our share of the responsibility for the society in which we are an active part and for future generations.

We develop and produce in Germany. We thus guarantee outstanding product quality and compliance with the demanding ecological and social standards in Germany.

Sustainability is also an important principle for us in manufacturing and marketing. One manifestation of this is the certification by the world's most exacting environmental system pursuant to the EU eco-audit ordinance EMAS.

Sustainability, active proximity to users, impressive product quality and open simplicity – these are the four principles on which our ideas and actions are based.

The page surfer

Sliders are the innovative ballpoint pens with Viscoglide® technology for exceptionally easy, gliding writing. The progressive design and its ergonomic form with rubberised surface guarantee a good grip and allow a natural writing movement without hand fatigue. Wear-resistant stainless steel tips guarantee particular longevity and reliability. The writing dries quickly – even on smooth paper – and is smudge proof even when highlighting it later on.

The Slider Edge XB in its classical pen shape is ideal for pupils' pencil cases and shallow desk drawers. The three-edged barrel gives a good grip and will not roll on the desk. The Slider Memo XB is fitted with a robust metal clip for mobile use. The Slider Rave XB writes using the newly developed large refill Slider 755 XB. The refill is exchangeable and will fit all Schneider ballpoint pens with Plug & Play-System.

Slider Rave **New**

The popular Viscoglide® technology is now available in a retractable ballpoint pen! The new large refill Slider 755 with extra broad tip allows for easy, gliding writing and excels through high writing performance. The writing inks black and blue are waterproof according to ISO 12757-2. The barrel of the Slider Rave is rubberised and ergonomically shaped, which facilitates a natural writing movement without hand fatigue.

The fun-roller

Breeze is an ergonomic cartridge Design, ergonomics and writing properties appeal to pupils of all ages, students and young adults. Breeze has a soft feel and writes extremely effortless. With such a pen you can tackle any task.

Breeze writes using the newly developed roller cartridge 852. This sets new standards in terms of ease and eclipses all its predecessors. An ink regulator ensures constant ink flow from start to finish. The new ink formula is even faster drying and smudge proof when highlighting.

Breeze is extremely comfortable to hold. The recessed grip supports three fingers and the contrasting decorative ornaments acts as a haptic element preventing the fingers from slipping. The design, which is similar to a muscle, has that sporty casual look and is equally suited for right and left-handers.

Base Senso **New**

Learn how to write without pressure. A warning lamp at the end of the pen indicates when there is too much writing pressure. The children thus learn how to graduate the pressing force so that they write in a relaxed manner and can easily change to the fountain pen later on.

Ergonomic grip piece with three anti-slip rubberised finger areas, suited for right and left-handed persons. With replaceable roller cartridge 852, royal blue, erasable. Replacement cartridges see page 45.

Base Kid **New**

The young writers fountain pen that grows with the child. With a short barrel for small hands, and a large barrel for large hands. The ergonomic grip piece is elastic and anti-slip. You automatically pick up the pen correctly. The anti-slip brake to the front avoids ink fingers, and the large finger areas prevent pressure points. There is the mirror L-version for left-handed persons.

Robust manufacturing with anti-roll protection. View to both ink cartridges. High-quality stainless steel nib with iridium grain. Spare nibs see page 45.

The word accelerator

The name "Xtra" stands for rollerballs for fast writing. The innovative Liquid-Ink-technology makes this possible and even guarantees an even ink flow from the beginning to the end. The regulator system compensates temperature and air pressure fluctuations and avoids ink smearing. The liquid ink is stored in the reservoir. This allows for a higher filling quantity, and nothing remains in the fibres. The ink level can be checked in a window. The cap-off ink does not run dry, even if the cap of the writing instrument is removed during 2 or 3 days.

Xtra

Rollerball with innovative Liquid-Ink-technology. The ink regulator controls the flow of ink precisely and evenly from start to finish, without ink spots or gaps. The large ink reserve can be checked in a window and is used up completely. The cap-off ink does not run dry, even if the cap of the writing instrument is removed during 2 or 3 days.

Xtra Document

Rollerball with Liquid-Ink-technology and conical tip made of wear-resistant stainless steel. Waterproof according to ISO 14145-2. Ergonomic rubberised grip zone and high-quality metal clip.

The note master

The Xpress is the new premium fineliner. Its strongly expressive form already promises a great deal. The easy flow of ink and the completely rubberised barrel ensure comfortable writing enjoyment. The waterproof ink according to ISO 14145-2 is water-based and guarantees permanent notes.

Due to continuous further development, Schneider has enhanced the proven technique. Ink, reservoir and tip are ideally tailored physically to one another to produce an even line. The fine tips are stabilised with a stainless steel tube that helps when working with a ruler and template. The cap-off ink does not run dry, even if the cap of the writing instrument is removed during 2 or 3 days.

Xpress

The premium fineliner for waterproof notes. The ergonomic form with completely rubberised surface guarantees a safe grip and allows a natural writing movement without hand fatigue. The fibre tip slides wonderfully smoothly and produces an expressive and striking script.

Cap with high-quality metal clip, tip holder made of stainless steel, waterproof ink according to ISO 14145-2.

Markers

Highlighting, characters and text create clarity, give instructions and attract attention. Or they are just decorations. The media are just as varied as the goals: paper, cardboard, plastics, foils, boards, metal, glass and much more. Schneider offers solutions for almost any case.

User-friendly details make your work easier. Cap-off inks do not run dry, even if you leave the marker open for some time. The board marker ink is also suitable for flip charts; annoying mistakes are thus avoided.

For special uses, there are opaque paint markers. They are water and weatherproof, light-resistant and resistant to many abrasives and washing processes. Schneider deco-markers can be wiped off glass and boards.

Ingeniously simple and clean: the Maxx markers are refilled with cartridges. Schneider offers environmentally friendly and cost-effective refill options for most other markers too.

Job

Highlighter with a chisel tip. Vivid, light-resistant and water-based ink for normal, copy and fax paper. Refillable with Refill station Maxx 660.

This overview provides a rough collection of properties and applications of our markers. In individual cases we cannot guarantee the accuracy of promised features, since many of the technical parameters are beyond our control. For special applications that do not meet the standard according to usage (eg office, school, home, hobby), please ask for the most appropriate solution. In principle, for a good grip on (smooth) surfaces, a clean dry surface is necessary.

The display concept

We have restructured the entire area of product communication so that consumers can notice our offer better and in a differentiated way. A standardised concept for stand-alone displays and a shop-in-shop system provide improved visibility and orientation at the point of sale. Retailers have new options for presenting the goods in a structured and attractive manner.

The stand-alone displays always have the same basic form and dimensions. They can be combined with each other and extended to cover whole topics. Three individual displays can be mounted in the 50 cm grid.

The complete Schneider product range can be presented in the new shop-in-shop. The individual displays and blister hooks can be mounted in the high-quality metal frame with illuminated header which offers space for product labels and test writing pads.

Signs and symbols

Cap off

Can be kept open for 2 to 3 days without drying up.

For Documents

The writing is permanent according to ISO part 2 "documentary use".

Refillable

The pens can be refilled with refills, cartridges or reservoirs.

Refillable with Plug & Play

Ballpoint pens and refills with this symbol are compatible to each other.

Water and light resistant

The writing doesn't dissolve in water and remains visible after UV radiation.

Biosafe

Bio-plastic barrel made of naturally renewable and biodegradable materials.
